

PFAS Statement – Microtech Electronics Ltd

At Microtech Electronics Ltd, we are committed to environmental sustainability and the well-being of our customers and communities. As part of our ongoing efforts to minimize environmental impact and adhere to the highest safety standards, we can confirm that **Microtech Electronics Ltd does not use Printed Circuit Boards (PCBs) that contain PFAS (Per- and Polyfluoroalkyl Substances) chemicals** in any of our products.

We recognize the growing concerns surrounding PFAS due to their persistence in the environment and potential health risks. In line with our commitment to responsible manufacturing, we have taken proactive measures to ensure that our supply chain and production processes are free from these substances.

Microtech Electronics Ltd continues to work closely with suppliers and partners to ensure that all materials used in our PCBs meet strict environmental and safety regulations. We remain dedicated to providing high-quality, PFAS-free solutions for our customers while contributing to a more sustainable future.
