

Microtech Electronics Limited		
	Conflict Minerals Statement	Issue: A2 Date: June 2026

Conflict Minerals Statement

Microtech Electronics Ltd is committed to conducting business ethically and responsibly throughout our supply chain. As a UK-based electronics contract manufacturing company, we support international efforts to prevent the financing of armed groups and human rights abuses associated with the extraction, trade, handling, and export of certain minerals.

Conflict minerals commonly refer to tin, tantalum, tungsten, and gold (3TG), which may originate from conflict-affected and high-risk areas (CAHRAs), including the Democratic Republic of the Congo (DRC) and adjoining countries.

Although Microtech Electronics Ltd is not a direct purchaser of raw minerals and does not smelt or refine minerals, we recognize our responsibility to promote transparency and responsible sourcing practices within our supply chain.

To support this commitment, Microtech Electronics Ltd

- Expects suppliers to source materials responsibly and in accordance with applicable laws, regulations, and internationally recognized standards.
- Encourages suppliers to perform due diligence on the source and chain of custody of conflict minerals contained in products supplied to us.
- Upon requests, suppliers to provide accurate and timely information regarding the presence and origin of 3TG minerals in products and components supplied to Microtech Electronics Ltd.
- Supports the use of responsible smelters and refiners that have been independently assessed through recognized industry programs.
- Maintains records and documentation relating to conflict minerals declarations and supplier due diligence activities where applicable.
- Seeks continuous improvement in supply chain transparency and responsible sourcing practices.

Where requested by customers, Microtech Electronics Ltd will make reasonable efforts to obtain and provide conflict minerals information from relevant suppliers

Microtech Electronics Ltd is committed to reviewing this policy periodically and updating our processes as necessary to support responsible mineral sourcing and compliance with applicable customer, regulatory, and industry requirements.

Signed:

Simon Thomson : Managing Director
